Installations Instructions

1. Install MelonLoader 0.7.2+ according with Getting Started instruction:
<https://melonwiki.xyz/#/README>
2. Copy all mod folder to root <Game folder> folder and start game
3. Launch the game. Configuration file will be generated automatically on the first run in <Game folder>\UserData\
4. Open the configuration file and enable the modifications you are interested in

General information

In this modification used IDs for enemy types and character genders.

Dirty Talk frequency depends on in-game Dirty talk frequency option.

1. Character genders:
 - Female – female character with passive role;
 - Futa – female character with active role;
 - Male – male character with any role.
2. Enemy types:
 - 0 – master;
 - 1 – fighter;
 - 2 – Ninja;
 - 3 – Police;
 - 4 – Servant;
 - 5 – Thug;
 - 6 – Villain;
 - 7 – Succubus;
 - 8 – Worker.
3. Separate phrases by target gender:

In configuration file you will found blocks of strings:

```
"<BlockName>": {  
    "Base": [],  
    "Female": [],  
    "Futa": [],  
    "Male": []  
}
```

These blocks give you possibility to separate taunts or inner thoughts by target gender.

- Base – strings which will be used by default;
- Female – strings for female target;
- Futa – strings for futa(active female) target;
- Male – strings for male target.

4. Submissive / Dominant phrases:

In configuration file you will found block of strings:

```
"<BlockName>": {},  
"<BlockName>Dominant": {},  
"<BlockName>Submissive": {}
```

These blocks give you possibility to separate taunts or inner thoughts by domination level.

- <BlockName> – strings which will be used by default and while domination value in range 250-750;
- <BlockName>Dominant – strings which will be used when character dominate on target;
- <BlockName> – strings which will be used when character obeys target.
